

Measurement Guide

When measuring we recommend that you use a metal tape measure for accuracy.

Measuring Curtains

Drop Measurement

Tracks: Measure from where you want the top of your curtains to sit on the track to the required length. If in doubt please call us for assistance.

Poles: Measure from the base of the curtain ring to your required length. If in doubt please call us for assistance.

Width Measurement

Measure from the outside of the window. Fullness should be 2-3 times this measurement, depending on the style of curtain and personal taste.

If in doubt please contact us for assistance and we can advise you on measuring widths for the particular style you choose.

Roman Blinds Measurement

Measure the inside width of the window at the top, the middle and the bottom. Measure the height of the window to size you require.

Track/Pole measurement

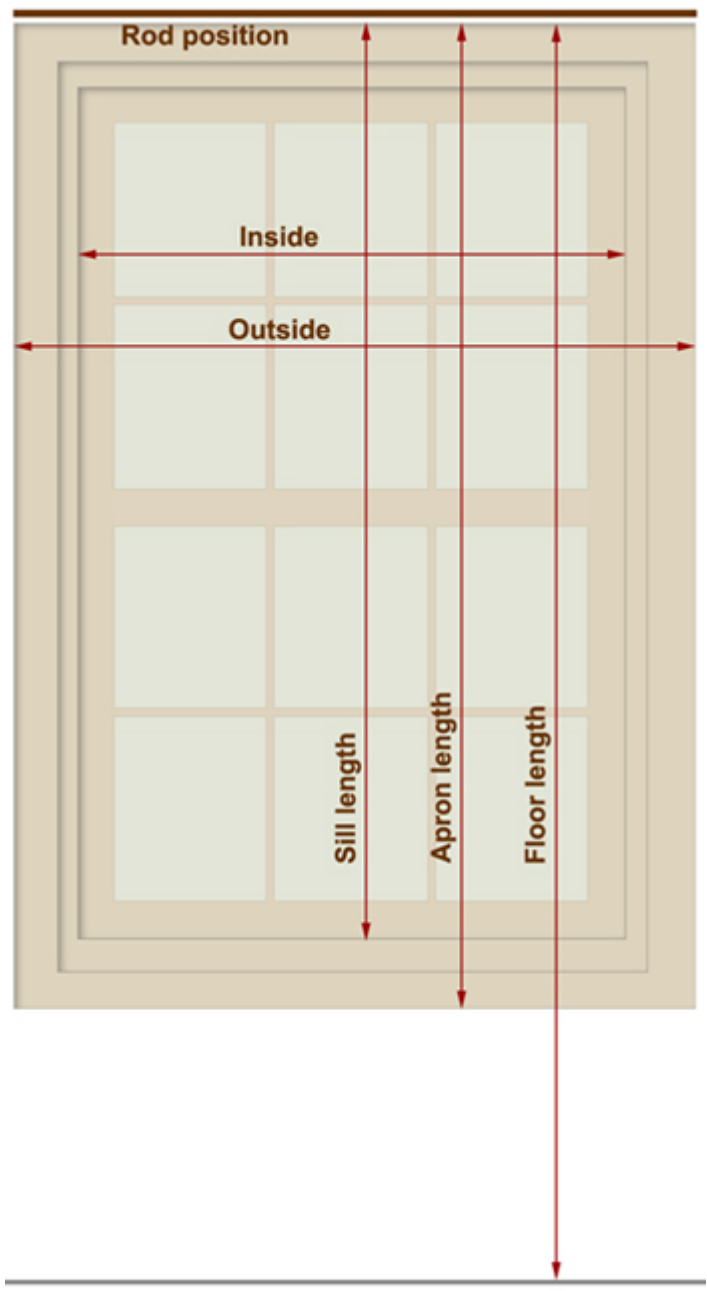

Please contact us for assistance.

Swags & Tails measurement

Please contact us for assistance.

Box Pelmet and Valances measurement

Please contact us for assistance.

NB: All measurements from clients are taken onboard. However, Elegant Curtains will not accept responsibility if incorrect measurements are supplied by the client.
